

Since its foundation in 1995, Fricke und Mallah Microwave Technology GmbH in Peine / Lower Saxony has been a leading manufacturer of microwave heating, drying and plasma systems, microwave generators up to 100 kW based on semiconductor, inverter and magnetron technology as well as microwave components (combiners, insulators, directional couplers, tuning units, waveguides) for the automotive, aviation, wood, ceramic and food industries. The operating frequencies are currently mainly 915 MHz and 2.45 GHz.

To reinforce our team, we are looking for a

Electrician in the field of switch cabinet construction (m/f/d)

Your duties:

- Design and wiring of control cabinets according to electrical circuit diagrams created with the latest version of EPLAN
- Occasional support during commissioning and repairs at home and abroad

Your profile:

- Completed specialist training in the field of electrical engineering
- Ability to work in a team, flexibility and ability to work independently, creatively and carefully
- Limited and occasional willingness to travel

We offer:

An independent, team-oriented, responsible position and performance-related pay in a challenging and varied field of activity.

Please, send us your entire application papers in:
